<p>This emulsion is composed of carboxylated polyoxyalkylene surfactant (A), nonionic surfactant having HLB of 4 to 10 (B), a high mol. silicone cpd. (C) a solvent for the silicone (D) and polyhydric alcohol (E).</p> <p>Pref. (A) is selected from polyoxyalkylene alkyletheralkyl carboxylate and polyoxyalkylene alkylphenyletheralkyl carboxylate. (B) is selected from polyoxyalkylene alkyl phenylether, polyoxy-alkylene alkylether and sorbitan ester of higher fatty acid. (E) is selected from 1,3-butylene glycol, glycerine and diglycerine. The emulsion is diluted by adding water to it.</p> <p>USE/ADVANTAGE - Used for hair cosmetics, hair-washing cosmetics and hair dye, etc. Good emulsion stability even when mixed with various agents such as hair dye, shampoo, or rinse. Cosmetics prepared by using the emulsion have good touch and refreshing feel. (11pp Dwg.No.0/0)</p>
